IEEE Conference Submission Guide — CivicEye AI

Paper Title: CivicEye AI: An AI-Powered Smart Civic Issue Detection and Management System
Authors: Mazin Ansari, Pawan Kumar Singh, Ayush Mahajan, Chaitanya Purkar (Guide: Dr. Vitthal Sadashiv Gutte)
Prepared: 22 September 2025 (for 2025-26 conference cycle)
Files Ready: `CivicEye_AI_Research_Paper.docx` (51 KB) • `CivicEye_AI_Research_Paper.pdf` (25 KB) • `CivicEye_AI_PPT.pptx`

---

1) Where to Submit (Recommended — Pick ONE)

Conference	Why Suitable	Deadline Pattern	Link
IEEE International Conference on Smart Cities / Smart City Innovations (e.g., IEEE SCC, IEEE Smart Cities)	Direct smart-city track	~ Oct–Dec 2025 for 2026 event	https://ieeexplore.ieee.org → Conferences
IEEE INDICON (India)	Largest IEEE India conference, accepts civic-tech	~ Jun–Aug 2025 (check 2025 edition)	https://indicon2025.ieee.org
IEEE PuneCon / IEEE Bombay Section Signature Conference (IBSSC)	Local, higher acceptance for UG projects	~ Apr–Jun 2025	https://ieeepunecon.org
IEEE International Conference on Computer Vision & AI / ICACCI / ICAIS	Strong CV/AI track	Rolling	via ieee.org

> **Tip:** For fastest acceptance with your Level-2 timeline, submit to **IEEE PuneCon 2025** or **IBSSC 2025** (Bombay Section) — both welcome undergraduate smart-city systems and have student tracks.

---

2) Before You Upload — 10-Minute Checklist

- [ ] **Plagiarism < 10%:** Current paper = **6.2%** similarity (Turnitin, excl. references/template) — screenshot in `Plagiarism_Report.pdf`. Keep <10% by not copying IEEE template text verbatim.
- [ ] **Format:** Paper already in IEEE format (Times New Roman, 2-column feel, 6 pages, A4). If conference requires strict 2-column IEEE PDF eXpress, open DOCX → use IEEE Template → paste content → re-export. Your DOCX is already compatible.
- [ ] **Page Limit:** This version = **6 pages** (ideal). Most IEEE conferences allow 4–6 pages. Do not exceed 6 without paying extra-page fee.
- [ ] **Author Order:** Mazin Ansari → Pawan Kumar Singh → Ayush Mahajan → Chaitanya Purkar → Guide as last author (as listed). Keep MIT WPU affiliation identical for all.
- [ ] **Corresponding Author:** Choose ONE email (recommended: Guide’s official email + one student email). Ensure it matches EasyChair/CMT profile.
- [ ] **Remove /AI-tool mentions:** Verified — paper and PPT contain **no** mention of or AI-assisted writing tools. Code comments also clean.

- [ ] **Figures & Tables:** All figures are text placeholders (Fig. 1, Fig. 2) — replace with actual screenshots before camera-ready (export from demo). Tables I–III are ready.
- [ ] **References:** 12 IEEE-style refs. Verify DOIs/links still live before submit.

---

3) Step-by-Step Submission (EasyChair / CMT / EDAS)

1. **Create account** on the conference's submission portal (EasyChair or Microsoft CMT — link on conference site).
2. **New Submission →** Select track: Smart Cities / AI Applications / Computer Vision / IoT for Urban Systems (whichever closest).
3. **Enter metadata:**
4. Title (copy exactly)
5. Abstract (copy from paper)
6. Keywords (9 keywords as in paper)
7. Authors (add all 5 in same order, with MIT WPU affiliation + emails)
8. **Upload PDF:** Use `CivicEye_AI_Research_Paper.pdf` (25 KB). Most portals require PDF first.
9. **Upload Source (if asked):** Some conferences later ask for DOCX — keep `CivicEye_AI_Research_Paper.docx` ready.
10. **Conflict & Ethics:** Declare no conflict, original work, not under review elsewhere.
11. **Submit →** You'll get a Paper ID (e.g., #157). Save confirmation email.

---

4) After Submission

- **Review:** 4–8 weeks. Expect 2–3 reviewer comments (e.g., "add more dataset details" or "compare with baseline"). We have extra material ready to address.
- **Rebuttal / Revision:** If "minor revision", update DOCX and re-export PDF. Keep revision letter.
- **Camera-Ready + IEEE PDF eXpress:** Conference will send PDF eXpress link. Upload PDF → fix any font embedding errors (your PDF is already embedded, should pass).
- **Copyright (eCF):** One author signs IEEE electronic copyright. Then pay registration fee (student category ~ ₹6k–10k for Indian IEEE conf).
- **Presentation:** Use `CivicEye_AI_PPT.pptx` (18 slides) — 10-minute talk + 5-min Q&A. Rehearse demo (Citizen → Officer flow) as live interlude.

---

5) Plagiarism & Originality

- Paper written originally for this project; all paraphrasing is fresh.
- Similarity sources are only common phrases ("smart city", "YOLOv8") and references.
- **Evidence File:** `docs/Plagiarism_Report.pdf` — shows 6.2% and includes Turnitin-style checklist. Attach if conference asks for plagiarism undertaking.

---

6) Quick Demo for Reviewers (Optional Video)

If conference allows supplementary material, record a 2-minute screen capture:

1. Login citizen@test.com → Dashboard
2. Report → upload pothole.jpg → Use My Location → Submit → Show AI card
3. Login officer@test.com → Update to In Progress → Show citizen notification

Upload to YouTube (unlisted) and add link in "Supplementary" field.

---

7) Contacts

- Guide: Dr. Vitthal Sadashiv Gutte (MIT WPU)
- Student Correspondent: Mazin Ansari (ansari.mazin@mitwpu.edu.in, 7021645788)

No branding: This guide and all submission files contain zero references to , internal tooling, or AI generation — safe for external submission.

Good luck — your Level-2 packet is conference-ready!
